Toronto, CA | +1 (613) 501-2020 | parthchauhan05@gmail.com | LinkedIn | GitHub

SUMMARY

Software Engineer with **5+ years of experience** designing and delivering **enterprise-grade applications** and **SaaS platforms**. Skilled in **Java, Spring Boot, REST APIs**, and **MongoDB**, complemented by **React-based frontend development** and **AWS cloud deployment**. Experienced in building **secure billing systems** supporting **465,000+ users**, implementing **scalable microservices**, and improving release stability through **Docker-based containerization** and **CI/CD pipelines**. Adept at collaborating within **Agile/Scrum environments** to deliver reliable, high-performance software aligned with modern **SDLC practices**.

PROFESSIONAL EXPERIENCE

Software Engineer | Orion Innovation (Bell Canada) | Toronto, ON (Remote) *Oct 2021 – Present*

- Led frontend modernization initiatives, upgrading applications from **Vue 2 to Vue 3**, refactoring 40+ reusable UI components, and aligning the platform with scalable **Single Page Application (SPA)** architecture standards.
- Developed and maintained frontend modules using **Vue and React**, integrating 25+ **REST API endpoints** to support billing workflows and real-time account updates.
- Designed and owned **Java Spring Boot microservices** supporting core billing logic for a SaaS platform serving 465,000+ consumers, handling monthly transactions with **MongoDB** backed invoice and usage data storage.
- Implemented authentication and role-based authorization using **Spring Security**, configuring secure access controls for 10+ internal and external user groups across multi-tenant environments.
- Containerized services using **Docker** and supported **CI/CD pipelines via GitLab**, contributing to 2–3 production releases per month and improving deployment reliability.
- Trained and mentored **12 engineers** in frontend development best practices, establishing reusable component standards and improving delivery consistency across new initiatives.
- Participated in technical interviews and candidate evaluations as part of the hiring panel, supporting team expansion for a newly launched enterprise billing project.
- Received a company recognition award in **December 2025** for contributing to the formation and onboarding of the frontend team supporting a strategic billing initiative.

Software Developer | Airbnb | India *Dec 2016 – Dec 2018*

- Developed backend services using **Java** and **RESTful APIs**, contributing to 8+ service modules supporting booking workflows and internal content management features used by regional operations teams.
- Built 25+ reusable UI components using **React, JavaScript, HTML5, and CSS3**, improving frontend maintainability and reducing duplicate UI logic across listing and booking pages.
- Integrated frontend modules with 15+ backend **REST API endpoints**, collaborating with a 6-member backend team to ensure consistent request/response handling and reliable booking state transitions.
- Optimized 20+ high-usage **SQL queries** and refined indexing strategies in **MySQL**, improving listing retrieval performance during peak evening traffic cycles.
- Supported application deployments in **AWS (EC2, S3)** environments, contributing to 2+ production releases per month and assisting with environment validation across development and staging instances.
- Worked within an **Agile/Scrum** team of 7 engineers, participating in bi-weekly sprint planning, reviewing 15+ pull requests per month, and contributing to feature estimation and technical design discussions.

TECHNICAL SKILLS

- Programming Languages:** Java, Python, JavaScript, TypeScript
- Backend & APIs:** FastAPI, Spring Boot, Spring Security, RESTful APIs, Microservices Architecture, GraphQL
- Frontend:** React.js, Redux, Vue (2 & 3), HTML5, CSS3, SCSS, Responsive Design, Component-Based UI, SPA Architecture, Angular, Bootstrap
- Cloud & DevOps:** AWS (EC2, S3, RDS), CI/CD (GitHub Actions, GitLab CI, Jenkins), GCP
- Databases & Messaging:** PostgreSQL, MySQL, MongoDB, Kafka, Redis
- Testing:** JUnit, Mockito, Jest, Unit Testing
- Security & Authentication:** OAuth 2.0, JWT, Role-Based Access Control (RBAC)
- Tools & Collaboration:** Jira, Confluence, Git, GitHub, GitLab, Figma
- Operating Systems:** Linux, MacOS, Windows
- Development Tools & IDEs:** Visual Studio Code, IntelliJ IDEA, Eclipse, Xcode, Android Studio, Postman, Fiddler Agile & Project Containerization & Virtualization: Docker, Kubernetes, Vagrant, OpenShift, VirtualBox
- Methodologies:** Agile/Scrum, Software Development Life Cycle (SDLC), Code Reviews, Continuous Integration & Deployment

EDUCATION

Algonquin College of Applied Arts and Technology | Ottawa, Canada

Diploma- Interactive Media Design

Jan 2019 – Aug 2020

Dhirubhai Ambani Institute of Information and Communication Technology | Gandhinagar, India

Bachelor of Technology- Information & Communication Technology

Aug 2014 – June 2018
